Drs. Dennis OConnell, Janelle OConnell, and Martha Hinman have organized *Special Tests of the Cardiopulmonary, Vascular, and Gastrointestinal Systems* by the different systems and describe each special test in terms of clinician action, normal findings, positive findings, special considerations, and references. Each major body region covered also includes a brief section on its history. Features:

In addition to the special tests categories, a submaximal exercise evaluation section has been added for clinicians who believe exercise is an excellent preventive and rehabilitative tool but who may be unfamiliar with the topic. *Special Tests of the Cardiopulmonary, Vascular, and Gastrointestinal Systems* is a must-have resource for students and clinicians in physical therapy, athletic training, and occupational therapy looking to recall the specifics of a particular test or learning it for the first time.
